## PROFILE SUMMARY

B.Tech (Computer Science and Engineering) from NIT Rourkela with 3 years of experience as Programmer Analyst and 1 year as Functional Consultant. As a functional consultant I have responsibly carried out end-to-end client implementation of HighRadius Receivables OnDemand Cloud applications projects across the globe in an individual capacity.

As a programmer analyst in Ramco, I have worked single-handedly organized system infrastructure documentation, strengthened codes and enhanced overall performance.

## CORE COMPETENCIES

| | | |
|---|---|---|
| ~ Client Relationship Management | ~ Team Management | ~ Strategic Planning |
| ~ Project Management | ~ Quick learner | ~ Design Thinking |

## WORK EXPERIENCE

### HighRadius, Hyderabad as Functional Consultant                           (Feb '19-Till Date)

➔ Implemented global projects as Sanofi, Thomson Reuters, Baker Hughes
➔ Streamlined their O2C (Order-to-Cash) process to help them automate their Account receivables and Treasury processes
➔ Wrote effective documentation for each client system to deliver comprehensive sets of requirements and alignment with business objectives
➔ Developed, configured, and tested applications for accurate alignment with project standards
➔ Professionally interacted with clients and closely understood their ERP and AS-IS cash handling process
➔ Became a client expert, engaged in building and improving the implementation, training methodologies and tools needed for the implementation
➔ Liaised between Technical team, Production support team and SAP consultants to assist with the resolution of system issues
➔ Actively involved during the Blueprint, Realization, Testing, Cutover, Go-Live & Hyper care phase of the project.
➔ Created and maintained product and operational related issues log, reporting on status as required by program structure

### Ramco System, Chennai as Programmer Analyst (Aviation Dept.)              (Aug '16-Feb '19)

➔ Attended requirement gathering meetings with clients to understand the new business requirement
➔ Worked on advanced SQL queries using Pivot, join, function, cursor and nested tables to extract and analyze data
➔ Created a front-end application using the RVW tool (Ramco Virtual Works) and back-end development by using SQL
➔ Built business logics (GST dashboard, GL account postings) using SQL stored procedures
➔ Conceptualized, designed, developed reports (Reconciliation report, Ageing reports)
➔ Supported implementation rollout for projects
➔ Documentation for smart search feature and Workflow approval functionality
